

(b) For local work accomplished subsequent to project authorization, only work started prior to authorization, and for which credit consideration was requested by letter dated on or before 31 March 1987, is eligible for credit under the provisions of section 104. New non-Federal work initiated after project authorization, provided it is on an element of the authorized project, is subject to limited credit under a separate authority. Such work, if the sponsor desires related credit, should be undertaken under formal agreement pursuant to section 215 of the Flood Control Act of 1968 Pub. L. 90-483, approved August 13, 1968, as amended.

(c) All creditable non-Federal costs for compatible work, and related benefits, may be considered in the project economic evaluation and, to the extent the related benefits are required for economic justification, creditable costs shall be included in total project first costs. In any event, costs for compatible work shall be included in total project first costs to at least the extent that credit is actually given, including LERRD.

(d) Flood control projects authorized in Pub. L. 99-662 subject to sections 903 (a) and (b) or similar provisions 401(b) and 601(b)) of that act fall, with respect to crediting non-Federal costs, under this paragraph. (However, pending completion of the relevant procedural requirements for such projects, as set forth in those provisions of the act, section 215 agreements covering proposed non-Federal accomplishment of compatible work on the project will not be executed.) Works eligible for credit will be explicitly addressed in new project reports submitted to the Secretary of the Army pursuant to sections 903 (a) and (b) or similar provisions.

(e) Formulas for determining the amount of allowable credit in accordance with these guidelines are provided in Appendix B.

§240.8 Credit criteria for projects authorized after 17 November 1986.

(a) In general, for projects authorized after 17 November 1986, work eligible for credit will be explicitly addressed in recommendations to Congress. If a report has been submitted to Congress,

work on an element of the recommended Federal project or work that reduces its construction cost can be considered for credit.

(b) Local work initiated after 17 November 1981 or within 5 years before the first obligation of funds for the reconnaissance study began, whichever is later, can be incorporated into the recommended plan for the purpose of economic evaluation. However, credit can be considered only for local work undertaken after the end of the reconnaissance study and for which a credit application has been acted upon prior to construction pursuant to §240.9 procedures. (For any portion of such work undertaken prior to 17 November 1986, credit may be granted only if a letter application was received prior to 31 March 1987.) If such work was undertaken between 17 November 1986 and the effective date of this regulation, an after-the-fact application pursuant to the §240.9 procedures will be accepted.

(c) Reports recommending Federal participation in a plan should include the following, "Future non-Federal expenditures for improvements that, prior to their construction, are found to be compatible with the plan recommended herein, as it may be subsequently modified, will entitle the (*sponsor's name*) to consideration for credit in accordance with the guidelines established under section 104, Pub. L. 99-662."

(d) All costs for non-Federal work incorporated in the recommended plan in accordance with this paragraph shall be included in total project first costs and will therefore be subject to cost sharing. Related benefits will be included in the project's economic evaluation.

§240.9 Procedures.

(a) For non-Federal works undertaken prior to 17 November 1986, credit determinations (deferred until these guidelines became effective) will be made by the Secretary in response to the applications received prior to 31 March 1987. Future non-Federal works for which credit may be allowed under the provisions of section 104 of Pub. L. 99-662 are limited, basically, to local works undertaken while Federal preauthorizations studies of a Federal
